Hi:

I am embarrassed to report that it is not yet final. Very minor changes were made since the draft you may have seen. We had the Huntingdon Life Sciences document peer-reviewed, so that RfD moved from a screening value in the appendix to the main body of the document. The chronic RfC value does remain in the appendix however due to the high uncertainty.

This document cleared internally back in September, and we are still awaiting clearance by Washington after incorporating some minor comments. We are expecting it's release any day now.

Bye for now

Dan

Dan, do you have an approximate release date for the final sulfolane PPRTV? We (NTP) are beginning to design studies and the draft support document has been useful. Wondering if there are any substantial revisions and when we can expect to be able to cite/link to the final.

Thanks

Scott
